

Lightning Wire Labs

IPFire on AWS (ARM)

IPFire on AWS (ARM)

Use the new ARM-based AWS instance to protect your cloud infrastructure

Amazon's new ARM-based instances are cheaper and faster than their x86-base counterparts.

Running IPFire on ARM allows you to get more out of your cloud infrastructure. Starting from only US\$0.01/hr, it is definitely worth a try. A 14-day free trial is available, too.

Key Features

- Use the full IPFire feature set at no extra charges
- Available in all regions (GovCloud excluded)
